Our projects.

1. Cielo Country Inn.

This is our flagship Project (a hotel with 22 tourist hotel rooms) with an ecotourism brand. We are green and we conserve the environment. The hotel has a community support angle especially towards underprivileged children.

2. Cielo Dairy Ecofarm.

This is a zero grazing project. We have a few cows but they are high milkers. Our target is to improve the breeds ourselves to arrive at 200 litres per day from only 8 cows with an income target of shs 60 million per year. We will grow with acquisition of more land for cultivation of adequate forage. We also produce biogas.

3. Fresh water Fish Farming.

We have a total of 6 fish ponds. We target harvesting 5,000 fish heads per harvest. With 2 harvests in a year, we target 10,000 fish heads with an estimated income of Shs 50 million per year.

4. Cielo Eco Honey.

We rear bees in an apiary with a capacity of 50 bee hives. Our plan is to grow these to 200 hives with a target of 2,000 liters of honey, expected to generate Shs 70 million per year.

5. Skilling In Agripreneurship For Increased Youth Employment

Since 2021, Cielo Ecofarm has been a partner of AVSI Foundation in youth agribusiness skilling. The skilling program is practical and leads to obtaining a competence certificate offered by the Directorate of Industrial Training (DIT) of the Uganda Ministry of Education.

The training is modular and covers all the key elements of production, processing and marketing for various Agribusinesses.

For more information about Agribusiness offers please email skilling@cieloin.com

5. Poultry and Rabbit farming

We rear native chicken breeds for healthy yellow yolk eggs and rabbits for the healthy white meat market. We organize agritourism around this too.

Our main market.

- We target the DRC export market for our fish via mpondwe boarder post
- Uganda local market for our dairy and honey projects (Our hotel and estates being the first market. Our coffee terrace restaurant is a key sales point to travelers)
- International and National Travelers and corporate projects for our hotel
- Cielo Business House also provides market for our farm products.

Community Development and Environment Protection - Our Business model

- Our projects especially the Fish farm, Dairy Zero grazing farm and Honey Farm provide employment to the local community.
- We also use these projects to skill the community around us especially the youth. We partner with institutions involved in entrepreneurship and skills development to promote sustainable enterprise development projects
- Our projects are all eco and green to contribute to environment conservation.
- The hotel supports projects for underprivileged communities especially children (education and health areas)
